

Recycle Savings

Stroma specialises in measuring & improving building performance.

Our expertise ranges from Dynamic Simulation Modelling, aM&T methods, and fabric performance testing, through to plant improvements and funding options.

Woven into tailored strategies, these approaches combine to deliver reductions in energy usage and CO₂ emissions, improving occupier comfort and reducing running costs.

For further information on our 'intelligent buildings strategy' contact **0845 621 11 11**
