

# Sustainability...

*what schools can achieve*

E & CO<sub>2</sub> & £

Stroma's approach aims to achieve compliance and financial savings for the educational sector.

#### Capabilities range from:

- o Design Advice from in-house Architects
- o Part L Compliance
- o BREEAM Assessments
- o Energy Audits & Feasibility Studies
- o Air-tightness & Acoustic Consultancy and Testing
- o On-site Contracting Works
- o EPCs/DECs

To find out more about how Stroma can assist your project contact **0845 621 11 11**

In addition to energy surveys, inspections and compliance testing (air & acoustic), Stroma's 'on-site' operations include air-sealing, insulation, fire-stopping & passive fire protection works on new-build and refurbishment projects.

This and Stroma's UKAS accredited air and acoustics division (for compliance with BB93) provides a comprehensive compliance offering that is ideally engaged at the earliest stages.
