

Case Study

Hunger Hill, Morley

Code for Sustainable Homes Assessments and Advice

Clients Requirements

An extra care residential development of 46 one and two bed self-contained apartments for the elderly, with communal facilities.

The project is situated near the centre of Morley, South Leeds, on an infill brownfield site. Stroma has been instructed by the client to deliver a full architectural service from design through to completion, in addition to providing Code for Sustainable Homes assessments and advice to ensure that the dwellings reach the minimum Code level 3 required to secure HCA funding. We are also undertaking the necessary SAP calculations and the production of Energy Performance Certificates (EPC).
