About Stroma...

Operating throughout the UK and Ireland, Stroma specialises in measuring and improving building performance in the residential and non-residential sectors. Established in 2002, the company has continuously expanded its scope of services, increasing personnel numbers and turnover year on year and acquiring numerous accolades in the process, such as UKAS accreditation, RIBA chartered status, BRE accreditation and ISO 9001.

Collectively, the Stroma group adopts a co-ordinated approach to building sustainability and compliance, identifying and implementing the optimal planned or remedial measures for meeting energy performance targets and compliance requirements; reducing running costs and carbon emissions; and ensuring occupant comfort.

For further information on any of Stroma's services, call 0845 621 11 11, email info@stroma.com or visit www.stroma.com.

Also part of the Stroma group...

Stroma Certification, sister company to Stroma Technology and leading CLG-approved certification body, offers a range of flexible combined training and certification packages for monitoring, measuring and improving building performance:

- Energy assessment (commercial, residential and public building)
- Code for Sustainable Homes (CSH) assessment
- Air-conditioning inspection
- Fire risk assessment training
- BINDT approved air leakage testing training (plus UKAS calibration and sale of air-tightness testing equipment)
- Carbon management
- BPEC Part P Domestic Electrical Installation
- Renewable Technologies
- CPD Channel – online subscription to CPD service
