

Intumescent Coatings with Stroma

APPROVED

Stroma is an approved applicator of most recognised forms of thin film intumescent coating including Nullifire, Leighs, PPG, Jotun, Protega, Firetherm and International Paints.

Our team of experienced installers and technicians can assist with initial design and deliver a high-quality solution for any fire protection requirements.

Work can be done to the required specification either on site or at the factory. In addition, all other forms of passive fire protection (i.e. boards, batts etc.) can be installed.

Stroma Contracting also specialises in fire stopping and air/acoustic sealing. Working alongside our air tightness and acoustic testing & consultancy colleagues in Stroma Technology, we can provide a full compliance solution.
