

## Case Study: Retail

- Client:** The Restaurant Group
- Location:** Metro Centre, Gateshead
- Contractor:** Interiors UK

### Summary:

Working with a major restaurant provider, as their Approved Inspector for Building Control, we have gained extensive knowledge and experience of this particular sector. We have worked on various restaurant units around the country, providing a 'one-stop-shop' service for this valued client through the appointment of a dedicated Client Manager. This allows flexibility for our client whilst also providing a consistent approach to all of their schemes throughout the country.

We recently worked on a new Coast to Coast restaurant within a prestigious shopping centre in the North East where consideration had to be taken of the existing fire engineered strategy of the centre. Through a close working relationship with the Architect and the Fire Service, we were able to help the smooth running of the scheme through to completion by providing a proactive Building Control Service.
